**Winding Core  
Your Roofing  
Membrane  
Roller**

# A power package can still be lightweight

Especially when using bitumen, the winding core makes life easy when unrolling roofing membranes. Threading the sheets into the roller is super easy. Optimal contact pressure, therefore completely ergonomical. Heat is not a problem for the winding core but also provides great protection.

"For me, the winding core is an absolute simplification of work when unrolling roofing membranes."

**Jürgen Moll,  
Flat roof specialist**

# Roofing Membrane Roller Winding Core

## Application

**Rock 'n' Roller:** Helps by unrolling roofing membranes, especially bitumen.

## Advantages & Comfort

- Great protection: Due to the opening along the entire length of the roller, the overlay can be placed centrally ensuring an overlap at both ends.
- Practical: Easy positioning through the funnel shaped opening and a controlled, easy and quick unrolling.
- Sturdy and heat resistant: Because of the aluminum core, the contact pressure is distributed evenly over the entire length.
- Handy: Lightweight tool

Item no. 04240000

Application Video

Item no.	Working width	Dimensions	Weight	Details	PU
04240000	950 mm	60 x 950 mm	1,5 kg	Ø 60 mm	1
