**Seaming Pro**® New Generation  
**Your Seaming Machine**

# Because one device has three functions

More profit, very easy to use and results that are premium – just like you! This is what the Seaming Pro® New Generation – our new seaming tool – stands for. With it you save an enormous amount of time. No matter whether you create double standing seams or single standing seams! Or cut off the old seam. It can do everything. Simply mount your regular cordless screwdriver on the Seaming Pro® New Generation and get started!

**Get the Seaming Pro® New Generation  
for your next construction site!**

„Awesome 3 in 1 tool.  
Super compact and  
super easy to use.“

**Jakob Stiegmayr,  
Master Tinsmith  
from Tirol, Österreich**

# Seaming Machine Seaming Pro® New Generation

----------	--	------	---

## Your advantages and your comfort at a glance

- Complete: 1 unit for 3 applications – double standing seam, single standing seam and cutting off the old seam
- Fast: Creates double standing seams in just one work step – up to 8 to 12 meters (26-39ft) per minute
- Wireless: Simply attach your standard cordless screwdriver to one of two holders (roof or facade)
- Light and compact: The device weighs 6.5 kg (14 lbs) without cordless screwdriver
- Problem-solving: Can be unlatched and latched into the seam
- Flexible: Quick modification to the different functions
- Time-saving: No need to pre-seam or seam with square seam folder or twin square seam folder
- Steplessly adjustable in height: The track wheels are adjustable from 25 mm to 38 mm (1" - 1.5") seamlessly
- Flat: Fits between facade and scaffolding
- Universal: You can process copper, zinc and aluminum up to 0.7 mm (21 gauge), galvanized or colored steel up to 0.6 mm (22 gauge), as well as stainless steel up to 0.5 mm (24 gauge)
- Extra smooth running: Thanks to the ball bearings in the track wheels, the operation is extra smooth
- Protective: Due to high-quality rubber wheels, the sheet metal roof is particularly protected during processing
- Simple: The cordless screwdriver can be attached and fixed without tools
- Impact resistant, dust and waterproof (IP67): With the new outdoor case, your Seaming Pro® is especially protected against external effects
- Safe and stabilizing: The front roller controls the existing profiling and holds the Seaming Pro® in place when closing the fold
